Applicant(s)

KAWAMURA, AKIRA

Examiner

HUY T. NGUYEN

Art Unit

2621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,11 and 13-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamagishi (5867176) .

Regarding claim 1, Yamagishi discloses an optical disk apparatus comprising: a detection unit which detects one information unit in one of a plurality of areas from an optical disk which stores said plurality of information units including management information and contents information corresponding to the management information in said plurality of areas (Figs. 2-3); a reading unit which stores the information unit including the management information and the contents information in a buffer (10,11) (column 6, lines 50-67, column 7,lines 1-10) and performs control in order to read the information unit from the buffer at predetermined timing; and a reproducing unit (12,13) which decodes and reproduces the contents information read out from the buffer by control of the reading unit (column 6,, lined 40 to column 7,line 45 .

Method claim 11, corresponds to apparatus claim 1, therefore method claim 11 is rejected by the same reason as applied to apparatus claim 1.

Regarding claims 13, Yamagishi further teaches the management information is navigation information and the content information is VOB (column 6, lines 40-68, Fig. 3).

Regarding claim 14, Yamagishi further teaches the predetermined area of the management information is a reserve area (Fig. 3).

### ***Allowable Subject Matter***

3. Claims 2-10, 12 and 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fukushima et al teach a reproducing apparatus for decoding the video information using management information.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
